

ZAIN SAJID

Full Stack MERN Developer

0308-4042598 | zainsajid.056@gmail.com | [linkedin.com/in/zain-sajid12](https://www.linkedin.com/in/zain-sajid12) | github.com/zain-sajid-18 | Lahore, Pakistan

PROFESSIONAL SUMMARY

Results-driven Full Stack MERN Developer and final-year Software Engineering student at the University of Central Punjab (graduating July 2026), with proven experience architecting, deploying, and maintaining scalable production-grade web applications and REST APIs. Proficient in real-time systems (Socket.io), AI-integrated platforms (OpenAI API), cross-platform mobile development (React Native), and responsive React.js frontends. Passionate about clean modular architecture, database optimization, and delivering measurable business impact through technology.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3	Backend: Node.js, Express.js, Nest.js, REST APIs, JWT Auth	Mobile: React Native (cross-platform iOS & Android)
Database: MongoDB, MySQL, Firebase, Mongoose ODM	Real-Time: Socket.io, WebSockets, Event-Driven Architecture	Tools: Git, GitHub, Postman, VS Code, npm, Linux CLI
Languages: JavaScript (ES6+), Python, C++, Java	Concepts: MVC, OOP, Design Patterns, Agile, System Design	AI/Cloud: OpenAI API, REST integration, MERN deployment

PROJECTS

IntelliBid – AI-Powered Online Auction Platform

React.js · Node.js · Express.js · MongoDB · OpenAI API · Socket.io

- Architected an end-to-end AI-driven auction platform with a real-time bidding engine via Socket.io — managing concurrent bids, bid-expiry countdowns, anti-sniping logic, and live leaderboard synchronization for hundreds of simultaneous users with zero data inconsistency.
- Integrated OpenAI API for intelligent product description generation, smart bid-price recommendations, and automated item categorization — significantly improving seller productivity and platform discoverability.
- Built secure JWT authentication with role-based access control (Admin / Seller / Buyer), complete item CRUD with multi-image upload, payment-ready checkout flow, and a real-time React.js dashboard with live toast notifications and auction-status tracking.
- Designed optimized MongoDB schemas with compound indexing and aggregation pipelines for bid-history analytics — maintaining sub-100ms API response times under peak concurrent bidding load.

Real-Time Chat Application

Node.js · Socket.io · MongoDB · JWT · React.js

- Developed a production-grade messaging platform with persistent WebSocket connections, live typing indicators, user presence detection, read-receipts, file sharing, and fully paginated chat history stored in MongoDB.
- Implemented JWT-secured REST endpoints, bcrypt password hashing, and XSS-safe rendering — achieving sub-50ms real-time message delivery latency under concurrent multi-room load.

E-Commerce Platform

React.js · Node.js · Express.js · MongoDB · Stripe-ready

- Delivered a full-featured e-commerce system with product catalogue, advanced search & filtering, cart and wishlist management, order lifecycle tracking, and a role-based admin analytics dashboard — cutting average API response time by 40% through compound indexing and query optimization.

Scalable REST API System

Node.js · Express.js · MongoDB · JWT · Modular Architecture

- Engineered a production-ready modular RESTful API with layered architecture (routes → controllers → services → models), Joi input validation, centralized error handling, JWT middleware, rate-limiting, and comprehensive Postman collection documentation for team onboarding.

EDUCATION

BS Software Engineering — University of Central Punjab (UCP), Lahore

2022 – July 2026

CGPA: 3.21 / 4.0 | Relevant Coursework: Data Structures & Algorithms · OOP · Database Systems · Computer Networks · Web Technologies · Software Engineering

CERTIFICATIONS & ACHIEVEMENTS

CS50x – Introduction to Computer Science (Harvard/edX) | Meta Front-End Developer Certificate (Coursera) | Google Developers Community Member

Final-Year Capstone: IntelliBid – AI Auction Platform | CGPA 3.21/4.0 | Active GitHub Contributor | Available for full-time roles from July 2026
